March 27, 2018 - French Presentation

## IMPORTANT NRCAN OVERVIEW AND UPDATES FOR FENESTRATION BUSINESSES:

### Developing a Canadian Roadmap for High Performance Residential Windows by 2030

In August 2017, federal, provincial and territorial governments published a market transformation strategy for residential windows in support of the Pan-Canadian Framework on Clean Growth and Climate Change. The strategy lays out short-, medium- and long-term aspirational goals for window performance to 2030, and key market barriers that must be overcome.

Join **Debbie Scharf**, Natural Resources Canada with support from Fenestration Canada's **Jeff Baker** (English presentation) and **Jean-François Kogovsek** (French presentation).

- Get an overview of the Canadian “roadmap” being developed to address the R&D and deployment barriers for high performance residential windows in Canada.
- Learn the next steps for meeting the shorter-term aspiration goals, including considerations for the ENERGY STAR® program.
- Ask questions to better understand the impact on the Canadian fenestration businesses.
